

## Data Analyst | Nairobi | Social Enterprise

### About Sistema.bio

Sistema.bio is a leading social enterprise operating in Latin America, India, and Africa that seeks to impact climate change, food security and poverty by deploying technology, training and financing to small farmers. Headquartered in Mexico City, Sistema.bio promotes a world where waste is a resource, and farmers are empowered and productive. We manufacture, sell, install and finance our patented biodigester systems for small and medium scale farmers to convert their waste into economic, health and environmental benefits. To-date our products have treated over 6.7m tons of farm waste, enabled over 25,000 people to produce clean energy, and saved over 36,000 ha of trees per year. By the end of 2021, our goal is to have installed biodigesters for over 200,000 people in 15 countries where they lack access to clean, renewable and cost-effective energy. We are expanding across Meru, Kericho and Kiambu in Kenya - and are looking for passionate individuals to join our team.

### Role Summary

This is a great opportunity to work with a global enterprise and be part of a growing team. Based in Nairobi and reporting into the COO, you will be answering business questions through data analysis, providing value around business units in all our countries of operations.

### Key Responsibilities

- Ensure data quality, accuracy, and reliability at all times across large data sets and multiple sources
- Manage master data and support initiatives for data integrity and normalization
- Make our data visible and user-friendly across the organization
- Analyse data to provide business insights (using internal and external data points)
- Present analysis results to peers as well as executives
- Perform data cleansing, when necessary

### Career Progression and Compensation

- We offer a competitive compensation and benefits package, with an opportunity to grow into a Data Manager within 24 months.

### Does this sound like you?

- You have a degree in Computer Science, Mathematics, Statistics, or Economics with 4+ years of data analysis experience
- You are extremely critical and have high attention to detail
- You work autonomously
- You have strong written and verbal communication skills
- You love challenges and answering complex business questions with data
- You are proficient at working with data analysis tools, bonus: you know SQL
- You know Salesforce (ideally you are a certified Salesforce administrator or developer)
