CHARACTERISTICS OF Sistema.bio®

Sistema.bio technology is a biogas hybrid reactor, designed to treat the daily waste of animal farms. The reactor ferments manure mixed with water, producing biogas and a powerful bio fertilizer.

DURABILITY: Our hybrid reactor is fabricated with high-quality, UV resistant geomembrane. Piping and assemblies are made out of hydraulic PVC and HDPE, offering long lifespan in the harsh conditions of the countryside.

PREFABRICATED KIT: The system is composed of a complete kit of prefabricated components optimized for packaging, transportation and easy installation. All parts are easily accessible for replacements. The manufacturing process complies with the strictest quality control standards to ensure a long product life.

VARIETY OF SIZES: Our product catalogue offers a range of reactor sizes, from 6 to 200m³, to meet the needs of small to medium farmers.

MODULAR: The design allows interconnection among reactors, increasing the system's treatment capacity. This allows Sistema.bio to adapt to a wide range of scenarios, and farmers to expand the reactor according to their needs.

EASY OPERATION AND MAINTENANCE: Any member of the family or worker on the farm can perform daily activities and simple long term maintenance.

COMPONENTS OF Sistema.bio®

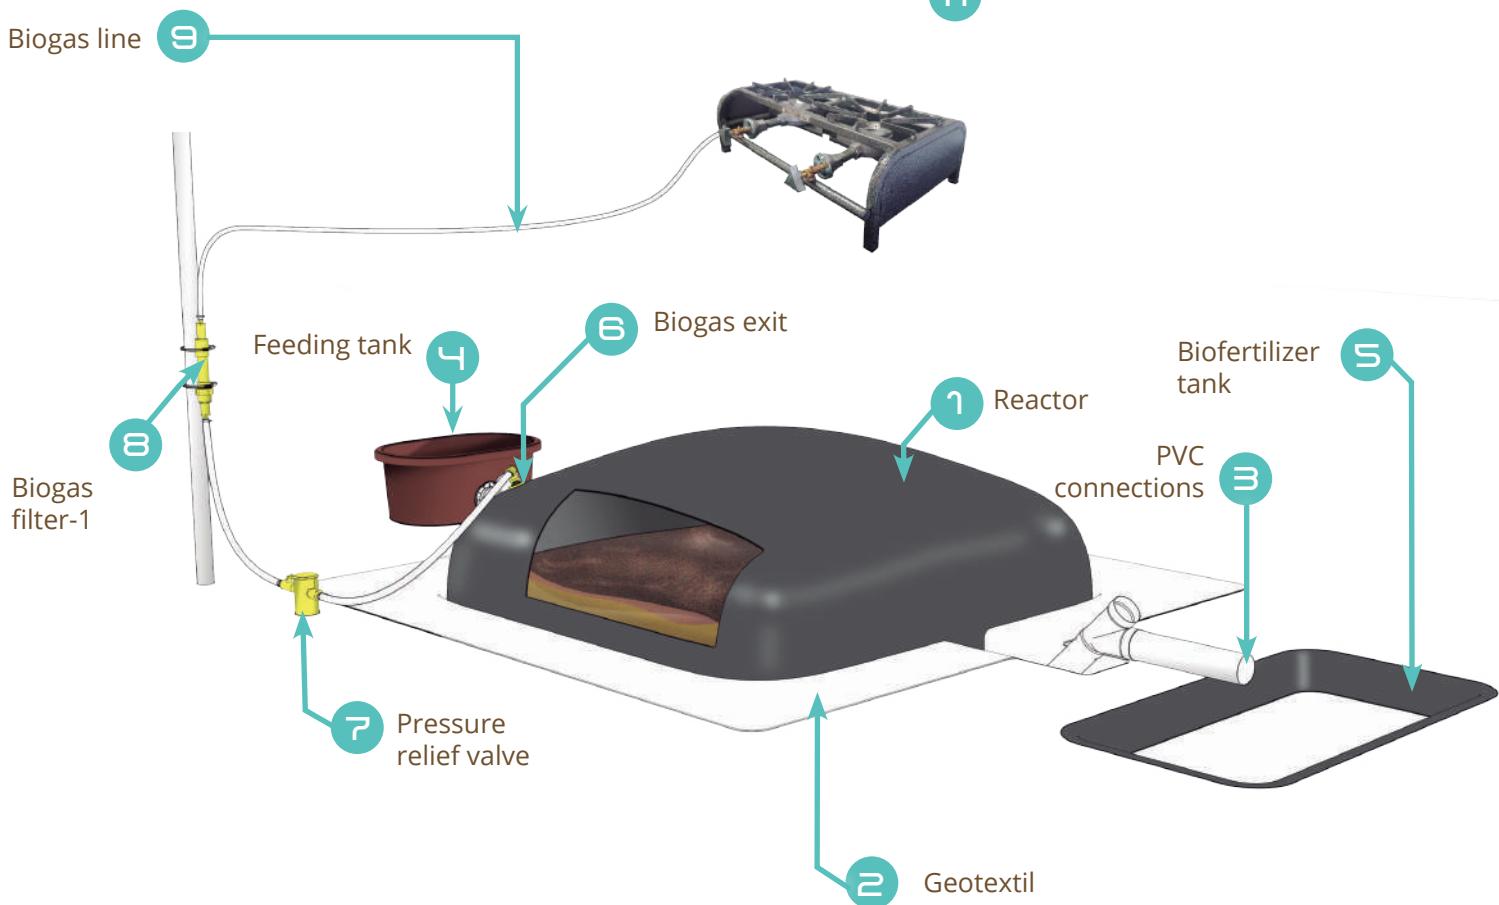

TABLE OF CONTENTS

Dairy cows						
Model	Manure (L/day)	Number of cows (fully confined)	Biogas production		Biofertilizer production	
			Daily biogas production (m³/d)*	Daily average consumption on one burner (h/day)**	Equivalent in LPG (kg/month)	(L/day)
Sistema 6	45	2	1.7	3.3	21	135
Sistema 8	65	3	2.4	4.8	31	195
Sistema 12	90	5	3.3	6.7	43	270
Sistema 16	130	7	4.8	9.6	62	390
Sistema 20	180	9	6.7	13.3	86	540
Sistema 30	260	13	9.6	19.2	124	780
Sistema 40	350	18	12.9	25.9	166	1050
Sistema 80	700	35	25.9	51.8	333	2100
Sistema 120	1050	53	38.8	77.7	499	3150
Sistema 160	1400	70	51.8	103.5	665	4200
Sistema 200	1750	88	64.7	129.4	831	5250
Sistema 6	35	2	1.3	2.5	16	105
Sistema 8	50	3	1.8	3.6	23	150
Sistema 12	65	3	2.3	4.7	30	195
Sistema 16	100	5	3.6	7.2	46	300
Sistema 20	135	7	4.9	9.7	63	405
Sistema 30	200	10	7.2	14.4	93	600
Sistema 40	265	13	9.6	19.1	123	795
Sistema 80	530	27	19	38	245	1590
Sistema 120	795	40	29	57	368	2385
Sistema 160	1060	53	38	76	491	3180
Sistema 200	1325	66	48	96	614	3975

Warm climate (>23°C)

Pig						
Model	Manure (L/day)	Number of pigs	Biogas production		Biofertilizer production	
			Daily biogas production (m³/d)*	Daily average consumption on one burner (h/day)**	Equivalent in LPG (kg/month)	(L/day)
Sistema 6	30	19	1.9	3.7	24	135
Sistema 8	40	25	2.5	5.0	32	180
Sistema 12	60	38	3.7	7.5	48	270
Sistema 16	80	50	5.0	10.0	64	360
Sistema 20	120	75	7.5	15.0	96	540
Sistema 30	180	113	11.2	22.5	144	810
Sistema 40	235	147	14.7	29.4	189	1058
Sistema 80	470	294	29	59	377	2115
Sistema 120	705	441	44	88	566	3173
Sistema 160	940	588	59	117	754	4230
Sistema 200	1175	735	73	147	943	5288

Temperate climate (15° to 23 °C)

* The biogas production is estimated based on a standard biodigester use.

** The production of biogas is variable and depends on particular farm's operating conditions.

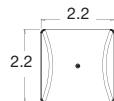

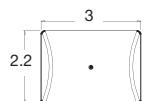

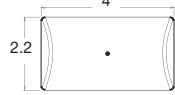

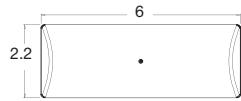

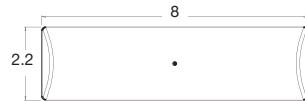

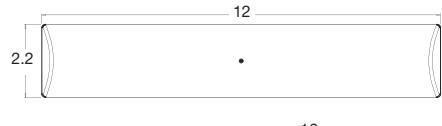

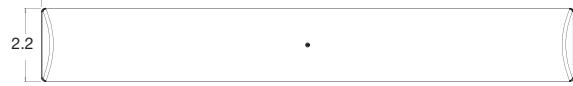

NOTE: a waste:dilution water ratio of 1:2 has been selected for cow manure.

* The biogas production is estimated based on a standard biodigester use.

** The production of biogas is variable and depends on particular farm's operating conditions.

NOTE: a waste:water dilution ratio of 1:3.5 has been selected for pig manure.
